ICS Expands Protective Clothing Scope to CEN and ISO Standards

ICS Laboratories Expands Protective Clothing scope to CEN and ISO Standards - July 1, 2006

Brunswick, Ohio - ICS Laboratories has expanded its scope of accredited testing and conformity assessment to include CEN (European) and ISO standards for protective clothing and gloves against chemicals and micro-organisms.

The accreditation was granted by the American Association for Laboratory Accreditation after on-site competency validation assurance auditing. Dale Pfriem, founder and President of ICS remarked; "By expanding out our protective clothing capabilities beyond ASTM and NFPA barrier performance standards, ICS further underlines our commitment to provide our clients with "One Source" conformity assessment and certification services – now inclusive of Chem/Bio Protective Clothing for CE Mark designated markets."

ICS is a North American source for CE Certification for a wide range Personal Protective Equipment.
