ICS Laboratories and SAI Global Expand Partnership to CE Certification

ICS Laboratories, Inc. has reached agreement with SAI Global and is expanding their partnership with them to include CE Certification of both Category I and Category II PPE. The association between ICS and SAI Global began with QAS and spans over 10 years, with ICS acting as their principle North American PPE test laboratory. The relationship to each other's business paradigms and strengths is optimal as SAI Global operates exclusively as a certifying body, and ICS exclusively as a conformity assessment test laboratory.

The expanding partnership with SAI Global will run concurrent with the dissolution of the current partnership with Certottica Scarl, which will be terminated on June 30th. ICS will maintain their relationship with Certottica in areas of complimentary test capabilities but Certottica will no longer function as the principle CE Certification body.
